EDUCATION

2022 - Current
NATIONAL AVIATION UNIVERSITY

- Software Engineering

SKILLS

- JavaScript
- HTML/CSS
- SQL
- React.js
- Java
- Python
- C#

LANGUAGES

- English: Pre Intermediate
- Ukrainian: Proficient
- Russian: Proficient

CAREER OBJECTIVE

To become a highly skilled and innovative frontend developer, proficient in creating intuitive, responsive, and accessible web applications using the latest technologies and best practices. My goal is to contribute to projects that enhance user experience, continually improve my technical expertise in frameworks like React or Vue.js, and grow into a leadership role where where I can mentor others and shape the UI/UX strategies for high-impact digital products.

PROJECTS

Qr Code App
Developer

- Develop the UI components for the QR code scanner using React.
- Ensure a responsive and intuitive user interface, including camera access for QR code scanning.
- Integrate QR code reading libraries.

Text to Speech Converter
Developer

- Develop the user interface (UI) to allow users to input text, select languages, adjust speech rate, and control playback.
- Implement the core functionality of the text-to-speech converter using JavaScript, leveraging the TTS libraries.

Trialem Website
Developer

- Implement the visual and interactive elements of the website.
- Ensure responsive design for various screen sizes and devices.
- Optimize the website for speed performance.
- Maintain cross-browser compatibility.
- Write clean, maintainable, and scalable code (HTML, CSS, JavaScript, ets.).

Maintenance Office Management System
Developer

- Develop an information system for housing management automation using C# (Windows Forms) and SQL Server.
- Implement CRUD operations and automate workflows for repair tracking, financial transactions, and reporting.
